EXPERIENCE

Freelance Full Stack Developer

Oct 2025 - Present

Self Employed

- Designed and deployed two production websites (Escape Ltd and Gentel Technical Services) focused on service presentation, lead generation, and SEO visibility.
- Built responsive, fast-loading interfaces using React/Next.js and modern UI tooling, ensuring cross-device compatibility and strong performance scores.
- Worked directly with business owners to translate service requirements into structured digital platforms that support marketing and customer inquiries.

SOLVIT AFRICA

Apr 2025 - May 2025

Software Developer Intern

- Contributed to both frontend and backend development tasks, implementing features using modern JavaScript frameworks and RESTful APIs.
- Worked with relational and NoSQL databases to design schemas, manage data, and support application functionality.
- Used Git for version control and collaborated within a team environment using branching, code reviews, and task tracking workflows.

PROJECTS

Escape Ltd Digital Platform | [Website](#) | [GitHub](#)

Nov 2025

Full Stack Developer

- Designed and developed Escape Ltd's digital platform to present services, showcase projects, and support client inquiries. The system is optimized for SEO, performance, and mobile responsiveness, enabling the company to improve online visibility and customer engagement.

Technologies: Next.js, Node.js, ExpressJs, REST APIs, Database MongoDB, Tailwind CSS, SEO

Gentle Technical Services — Company Website | [Website](#) | [Github](#)

Jan 2026
